I agree that it is not our role to respond, either. I do have concerns if we do cite the paper/series in our final report. If we choose not to cite it, then we do not need a call.

Joe et al,

I am not clear what the topic of the proposed call is. To respond to the HPS recordings as a group of independent experts or to use the report to dispute what Calabrese says? If the suggestion is for the latter, I do not think it is appropriate for your report to go there and even if it did fit within your task, the text would need to go through review. It is new text that is not being added in response to a reviewer's comment. Let me also add that at least 2-3 committee members did not want the report to even reference Calabrese's work because it is controversial.

I suggest we do not go there.... Hopefully NCRP will respond appropriately. Rania

It might be a good idea to jump on a quick call to discuss?

Gayle

In the absence of a response, I don't see how we can not at least give a reference to this.

Joe
